

SAYYAN / صَيَّان

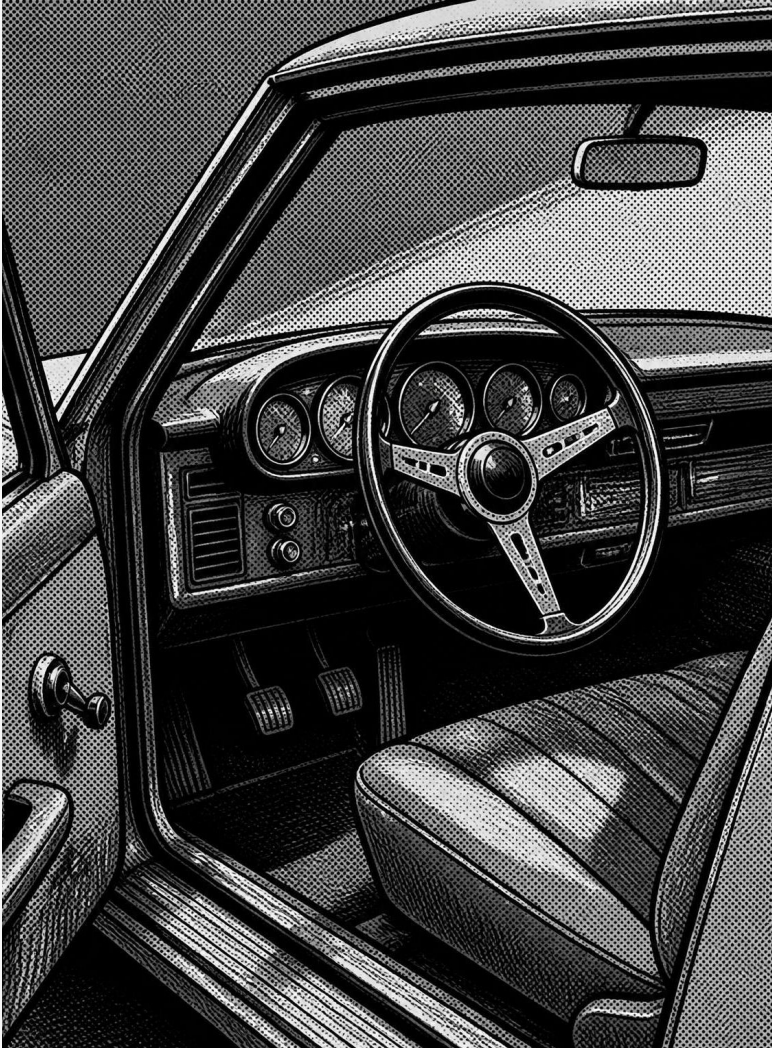

Smart Vehicle Care & Maintenance Platform

Understand, track, and manage vehicle maintenance throughout the ownership lifecycle.

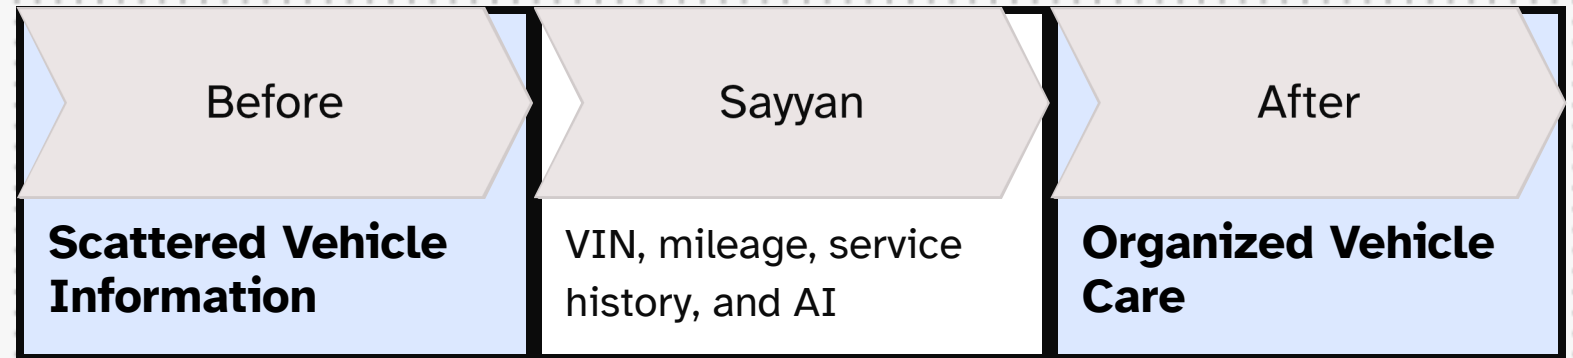

Team: Nawaf, Thikra, Subhiyyah

Made with **GAMMA**

THE PROBLEM & OUR SOLUTION

Owners struggle to know what maintenance is needed and when. Mileage, services, and receipts are scattered and tracked by hand.

Missed maintenance, unexpected problems, poor history, lost receipts, and difficulty understanding vehicle issues.

One centralized digital care system.

What the car needs, what is next, and what is done.

• ***KNOW YOUR VEHICLE***

VIN

Add a vehicle.

Vehicle Identification

Retrieve vehicle information.

Maintenance Data

Collect from automotive sources.

AI Analysis

Organize clear maintenance tasks.

Personalized Maintenance Plan

Required services at each kilometer milestone.

Technical vehicle data becomes a clear maintenance plan, with no manual research.

• ***STAY AHEAD OF MAINTENANCE***

 Current Kilometers Owner updates mileage.	 Maintenance Monitoring Compare with the plan.	 UPCOMING DUE OVERDUE Approaching, due, or overdue tasks.	 Reminder Owner receives reminders.	 Service Completed Record date, mileage, workshop, cost, receipt.	 Maintenance History Permanent service record.
--	--	---	---	---	--

Reactive → proactive maintenance. Know what the vehicle needs before it is missed.

• ***UNDERSTAND YOUR VEHICLE***

Describe a problem simply: engine noise, vibration, warning light, or unusual fuel use.

Driver Observation

Describe the problem.

Vehicle Context

Vehicle information.

Maintenance History

Combined with the observation.

AI Analysis

Possible areas needing attention.

Clear Guidance

Plain terms and next steps.

Better Decision

Whether to inspect or service.

An intelligent assistant translating vehicle information into clear guidance.

Possible causes, not a definitive mechanical diagnosis.

THANK YOU
